Coding Challenge #3: Account

In this lesson, you will extend the Account class that we built in the previous and add new functionalities based on the requirements below.

WE'LL COVER THE FOLLOWING ∧

- Problem Statement
- Coding Exercise

Problem Statement

Let's build upon a previous account object exercise. A bank account is still defined by:

- A `name` property.
- A `balance` property, initially set to 0.
- A `credit` method adding the value passed as an argument to the account balance.
- A `describe` method returning the account description.

Complete the following class:

Coding Exercise

```
// Complete the class
class Account{
  describe(){
            return "Name: " + this.name + "\nBalance: " + this.balance;
        }
}
```
