Exercise: Deduce the Outputs
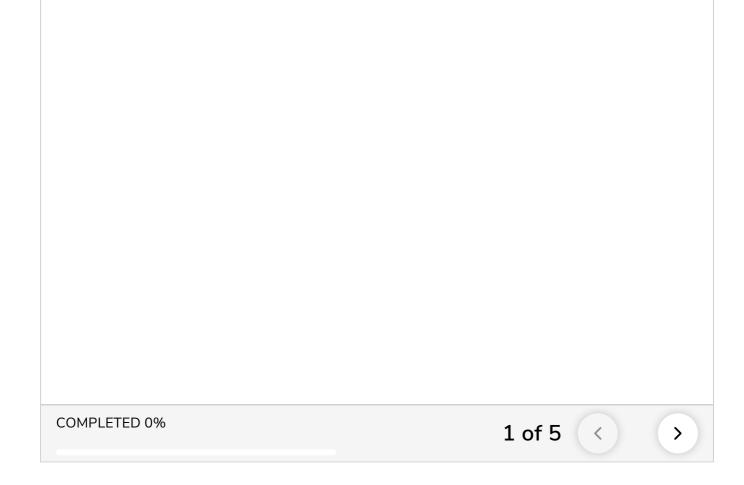

In this lesson your concepts will be evaluated through a quiz.

Choose one correct answer.

1 Deduce the output of the following program

```go
package main
import (
    "fmt"
)

func tel(ch chan int) {
    for i := 0; i < 5; i++ {
        ch <- i
    }
}

func main() {
    ok := true
    ch := make(chan int)

    go tel(ch)
    for ok {
        i, ok := <-ch
        fmt.Printf("ok is %t and the counter is at %d\n", ok,
 i)
    }
}
```

We hope that you performed well in the quiz. That is it about the goroutines and enabling parallelism with different techniques using channels. In the next chapter, we'll discuss networking and web applications.
